RapSheet with out of date DarkRP Version.

Why do I need the most updated version?

In order for me to make **Rapsheet** automatically log FAdmin commands, it needs to use **DarkRP** version 2.6.0. So if your server is already using that you can go ahead and close that because this doesn't apply to you. If you are using **2.5.1** and assuming you've correctly modified **DarkRP** it's as simple as just updating your **DarkRP** to the latest version found [here](). Once you do that simply restart your server and Rapsheet will start to log FAdmin Commands. If you are using **DarkRP** version **2.4.3** or if you have not used DarkRPModification when customizing **DarkRP** then you will need to manually copy the file from the FAdmin folder into their respective folder. For **DarkRP** version **2.4.3/lower** download [theses files]() and replace the files in **garrysmod\gamemodes\darkrp\gamemode\fadmin** restart your server and your good to go. As ever if you have any questions then please contact me
